

Certified Professional for UX-Development

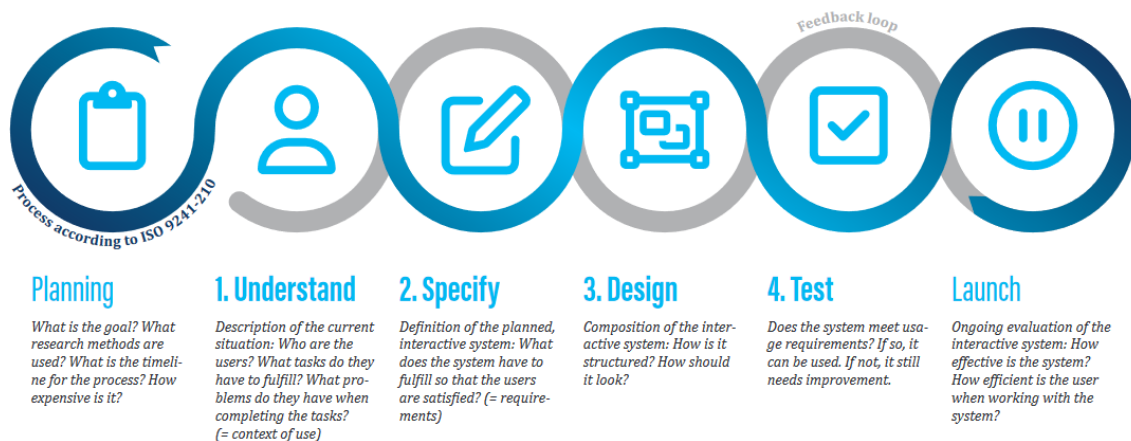

What is UX-Development?

As UX-developers our goal is to make websites, apps, and other interactive systems as easy as possible for users to operate. To achieve this, we first must gain an understanding of our users. Therefore, we developed our own process, which has already been successful in numerous occasions, always keeping the user at the center. This process is also known as human-centered design. The usage of this interactive system should be a positive experience for our users.

In this certificate programme, you will learn about the process of designing user-friendly interactive systems. Furthermore, aspects such as branding, design, usability and function are also taken into account.

As a “Certified Professional for UX-Development”, you will be able to plan and design interactive systems in a user-friendly way that will add more value to your clients.

Human-centered design for interactive systems

Degree

Certified Professional for UX-Development as per ISO 9241-210 (Personal Certification Certified Professional for UX-Development as per ISO 17024)

Duration/ECTS

1 semester, 5 ECTS

Tuition Fees/Semester

EUR 2.200,- + student union fee for the certificate programme; EUR 295,- for the Personal Certification; EUR 195,- for crediting / examination of an external course

Study Places & Start of Course

Due to didactic considerations, the number of participants is limited;

Application Deadline

01.12.2022 - 26.02.2023

What contents are taught?

UX-development is a multidisciplinary activity that uses knowledge and methods from communication design, social sciences as well as psychology. We complete this with agile project management.

As a "Certified Professional for UX-Development" you possess the key abilities necessary for your next UX project:

- You analyse the users of a system and determine their needs.
- You define the criteria for a user-friendly operation.
- You develop prototypes for user-friendly websites and apps.
- You evaluate whether your prototypes meet the users' expectations.
- You manage the UX-process using agile methods.

Upon graduation, you will receive a university certificate (5 ECTS) and a certificate with the wording "Certified Professional for UX-Development".

Register directly for the personal certification exam

In case you have already completed the listed contents in any other related study program at the St. Pölten University of Applied Sciences or at any other educational institution, you can register for the personal certification exam (personal certificate) right away.

If you are interested, please contact us: wb_dmdt@fhstp.ac.at

Who is this course intended for?

The course is aimed at people with relevant previous knowledge in planning and designing interactive systems, e.g. project managers, designers, technicians, customer consultants and clients.

Note: In our certificate programme we focus on UX-development. UX-development is often confused with UI-design (User Interface Design). Please inform yourself before applying! If your goal is to work as a UI-designer, we recommend looking into other training and educational options.

Dates

- 24.03.2023 Fr and 25.04.2023 Sa (2 days on site)
- 28.04.2023 Fr and 29.04.2023 Sa (2 days on site)
- 02.06.2023 Fr and 03.06.2023 Sa (2 days on site)
- 24.06.2023 exam day (certification exam – optional)

Scientific Management
